MASK
GOALIE MASK CATALOG 2012

Dear Valued Friends,

We, WALL MASKS, are extremely proud of all our goalies around the world. There are thousands of hard puck-impacts that hit the goalies head. There is no time to hesitate. Only react, "Stop the puck"!

Our number one priority has always been to offer the best quality and safest goalie mask in the world! This ambition has kept us developing the WALL Mask the past years, by closely co-operating with the world best goalies and goalie coaches.

The latest material innovations and the best craftsmanship with years of experience are the key-words in our standard. We communicate closely with the goalies from the junior-level to the World Champion- goalies. Our aim is to provide every goalie with exactly what they desire in a custom mask based on fit and their individual style.

Our team is engaged and willing to do our best and even exceed it! We have a full range assortment of goalie masks that we can proudly present to all level goalies:

W10 Pro, W6 Pro, ProACTIVE, ACTIVE!

Let the hits come, we are ready!

New W10PRO design

The Choice of Professionals – Wall W10PRO: Pro-level goalie mask developed in co-operation with many world's top-goalies and leading coaches. W10PRO has passed through extremely strict safety regulation tests.

Our years experience of vintage craftsmanship with the state-of-the-art composite technology offer the superior level of protection. Complete composite outer shell constructed with Carbon and Kevlar (Aramid) fibers for lighter weight and strength.

Strategically located 12 layers of fibers for superior impact resistance. The shell is hand-laid and high pressure heat-molded. Resin infused to ensure complete saturation of the composite fibers.

The shell is carefully designed and contoured to move impact loads away from the frontal impact areas. Narrow profile chin area provides the larger movement range for easy head turns. Improved deeper backplate and pro-style five-point straps for controlled fit.

BRS (Blast Reduction System)

Air gate going through the ridge lines with precisely located air vent holes effectively reduce the pressure

wave inside the mask after a hit. This reduces the uncomfortable "ringing in the ears" after an impact.

Colours and patterns

Available in different colours and patterns.

Redesigned cage

Extra wide facial opening provides enhanced vertical and peripheral vision. The cage is designed for optimal vision.

The strong and stiff cage is made of stainless steel with extra TIG-welding for more strength.

Models: Cat Eye, Canada, Europe.

Available in chrome, gold, black, white and silver colours.

Rubatex inner liner

Lightweight pro Rubatex inner padding recommended by NHL-goalies. The liner is anatomically designed and ready to use. Top level impact absorption.

Easy adjustable chin-cup. Inner padding is fully washable.

W10 PRO masks have
always 1 year guarantee!

Dna **ACTIVE**

Professional level goalie mask developed in co-operation with Finnish and European top-goalies and leading coaches. Wall ProACTIVE masks have passed through extremely strict safety regulation tests and have been approved with the standard CE and HECC.

Exclusive lightweight, hand finished shell produced by using the latest injection moulding technique is made of highly durable and stiff ABS-plastic with 25% rubber in the composite for increased impact absorption.

All metal parts are made of stainless steel that ensures easy service of the mask. Every mask is delivered with a mask bag and a removable fitting set.

JR and SR

Two sizes available, Junior and Senior. Fitting set and mask carry bag included.

JR: head size less than 57 cm
SR: head size 57-60 cm

Colours and patterns

Available in different colours and patterns.

ProActive Cage

High-tension stainless steel-cage offers maximum safety and visibility.

Models: Cat-Eye, Canada, Europe.
Available in chrome, gold, black, white, silver.

HD 070 inner padding

New thermo molded inner padding for best comfort and safety. Easy to clean removable liner. Easily adjustable chin cup ensures firm hold in the toughest situations.

Improved ventilation

Optimized ventilation is guaranteed with classy hole cutouts.

ETP-System

The unique Extended Throat Protection (ETP)- system provides extra protection to the throat-area.

ETP ensures maximum mobility.

Wall ProACTIVE masks have always 1 year guarantee!

W6 PRO masks have
always 1 year guarantee!

Rubatex inner liner

Lightweight pro Rubatex inner padding recommended by NHL-goals. The liner is anatomically designed and ready to use. Top level impact absorption.

Easy adjustable chin-cup.

Inner padding is fully washable.

BRS (Blast Reduction System)

Air gate going through the ridge lines with precisely located air vent holes effectively reduce the pressure

wave inside the mask after a hit. This reduces the uncomfortable "ringing in the ears" after an impact.

Colours and patterns

Available in different colours and with air-brush-painted patterns (Thunder and Peak).

Redesigned cage

Extra wide facial opening provides enhanced vertical and peripheral vision. The cage is designed for optimal vision.

The strong and stiff cage is made of stainless steel with extra TIG-welding for more strength.

Models: Cat Eye, Canada, Europe.

Available in chrome, gold, black, white and silver colours.

w^ePRO

Professional level goalie mask developed in co-operation with the world's top-goalies and leading coaches. W6PRO masks have passed through extremely strict safety regulation tests and has been approved with the standard CE.

Injection molded outer shell constructed with strong ABS-plastic with 25% rubber-composite for lighter

weight and strength. Pro-level impact protection.

The shell is carefully designed and contoured to move impact loads away from the frontal impact areas.

Aggressive design provides the vertical stiffness.

Narrow profile chin area provides increased movement range for easy head turns.

Improved deeper backplate and pro-style five-point straps for controlled fit.

Hand-finished W6Pro-mask is delivered with a ProBag-carrying bag and extra sweat bands.
